@Indujaa Dhanabal this is regarding 1189 and 1190. Thats a really good catch. Even i would have not find this scenario. But this is the background of this issue.

In current mic page we show same day checkbox for float customers even they don't have same day for Any one (ACH Credit, ACH Debit, NACHA Import). If users check the same day box and try to approve it will throw the error you dont have sufficient privs to do that. But in Cash Management landing page we will populate the cutoff time of sameday privs. In that case user dont have same day privs and we populate "To be approved by 02/14/2019 sameday ach cutoff time" but thats not correct. But this will not happen after we do the phase 2, because in step 1 we will not show same day check box if that batch type dont have sameday privs. (edited)

@Senthil This is the feedback for @Indujaa Dhanabal the time she took in learning the application is very short the level of bugs she is finding is very impressive. I am very sad that she is leaving. But this is the typical example of finding bugs. i think everyone should learn from her how to find bug that includes me. Really good work @Indujaa Dhanabal. In case you change your mind or want to come back to work. Please message me you will always welcome to join my team
